WHAT IS SPC???

SPC (STONE-PLASTIC COMPOSITE) FLOORING IS A NEW TYPE OF ENVIRONMENTALLY FRIENDLY DECORATIVE MATERIALS, MADE OF NATURAL STONE POWDER (LIMESTONE) AND POLYMER RESIN (POLYVINYL CHLORIDE PVC) AND OTHER MATERIALS MIXED AND HOT-PRESSED. IT COMBINES THE STABILITY OF STONE AND THE TOUGHNESS OF PLASTIC, WITH WATERPROOF, WEAR-RESISTANT, IMPACT RESISTANCE AND OTHER CHARACTERISTICS. IT IS WIDELY USED IN HOMES, COMMERCIAL PREMISES AND OTHER PLACES.

MAIN FEATURES :

1.STRUCTURAL LAYERING:

- ① Wear layer: SPC flooring is covered with a transparent UV coating to enhance its scratch resistance and stain resistance.
- ② Color film layer: High definition printed texture layer that makes the flooring look like natural materials such as wood grain and stone grain.
- ③ SPC core layer: Stone powder with PVC mixing up to make it have high density, stability, and deformation resistance.
- ④ Bottom layer: Silent pad, enhances foot feel and reduces noise.

2.CORE ADVANTAGES:

- ① Waterproof and moisture-proof: completely 100% waterproof, suitable for wet areas such as kitchens and bathrooms.
- ② Zero formaldehyde: environmentally friendly material, no glue added. Our flooring meets the standards of indoor material safety.
- ③ Strong durability: The wear-resistant layer can withstand high-frequency trampling and the service life of up to several years.
- ④ Easy installation: Adopting click lock design, it can be directly laid on flat ground without the

3.APPLICABLE SCENES.

- ① Home: living room, bedroom, balcony, basement,
- ② Commercial: shopping malls, offices, hospitals, schools.
- ③ Special needs: floor heating compatibility (good thermal conductivity), home renovation (no need to remove the original floor).

SPC FLOORING

■ PERFORMANCE

Unprotected
Surface

Antimicrobial
Protected Surface

■ Antibacterial Properties

Innovative coatings and moisture-resistant, anti-mold backing provide a cleaner and healthier flooring solution for everyone. Microorganisms are unable to thrive, making the floor 99% cleaner than untreated flooring as certified by SGS, offering round-the-clock protection for your family.

■ Wear Resistance

SPC flooring features a transparent wear-resistant layer with a wear rotation count exceeding 10,000 cycles.

■ Stain Resistance

The unique dual UV coating ensures superior stain resistance for Yinuo SPC flooring. Common stains such as coffee, any type of sauce, oil, vinegar, or other marks can be easily cleaned with a wet mop.

■ Scratch resistance

Compared to conventional UV coatings, the scratch resistance is improved by 200%.

■ Fire Resistance

Tested for fire safety, it achieves a B1 fire rating and self-extinguishes when removed from the flame, ensuring life safety.

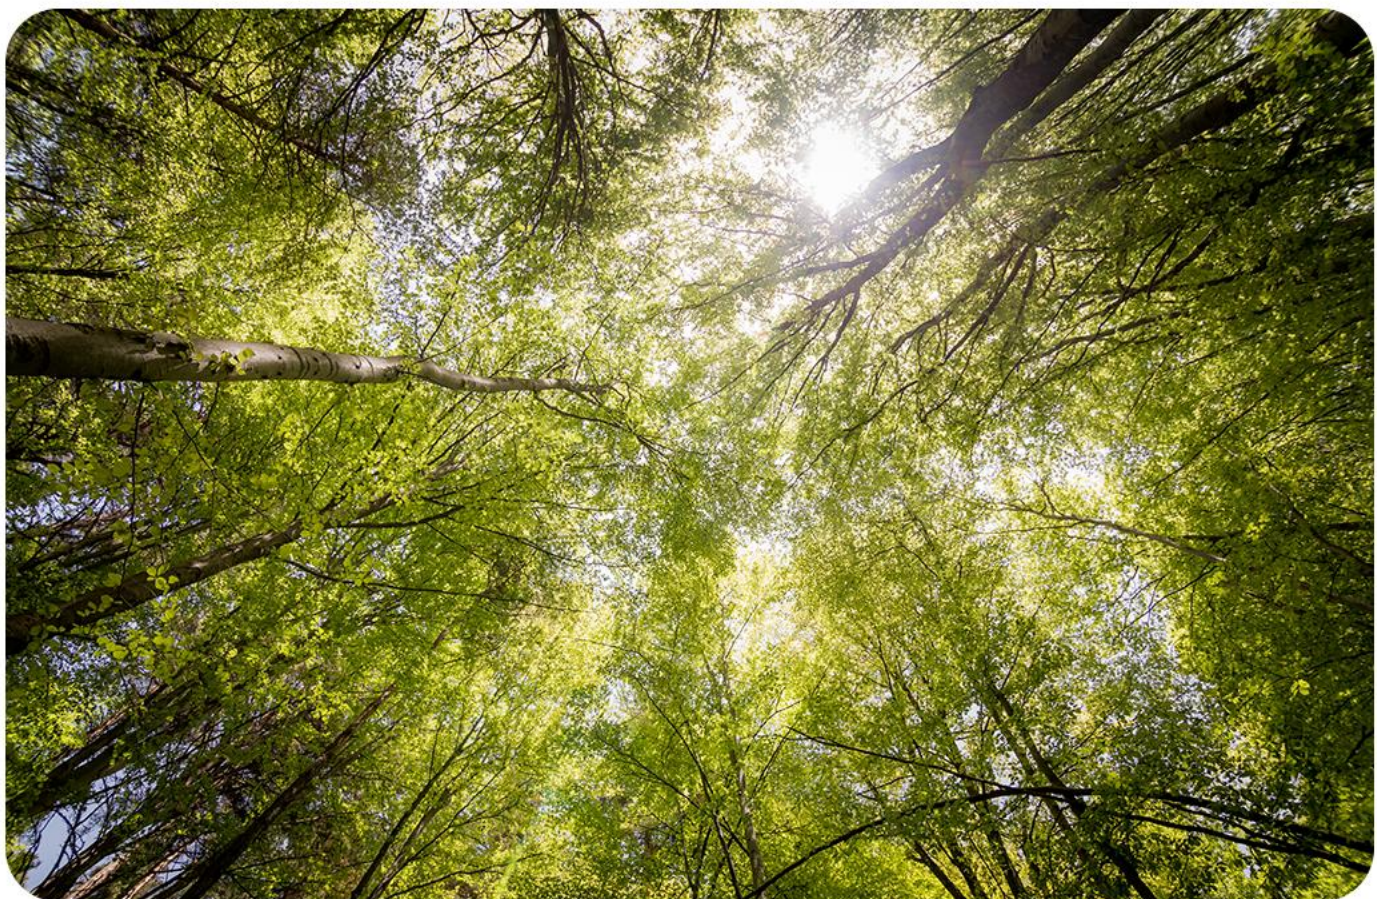

SPC FLOORING

■ PERFORMANCE

■ Impact resistance

With unique raw materials and manufacturing technique, SPC flooring can provide excellent impact resistance to you. You don't have to worry when you walk on it in your new high heels or dropping your heavy suitcase on the floor after your trip.

■ Eco-friendly

All materials used in the product are safe and environmentally friendly, have no impact on the human environment, and do not contain any radioactive elements.

■ 100% water proof

SPC flooring is a new type of 100% waterproof flooring material. The raw materials such as stone powder do not absorb water by nature, thus ensuring its waterproof property.

■ Anti slip

The surface features a high-density special-textured wood grain pattern. It becomes more slip-resistant when wet, preventing slips. Installing it at home alleviates safety concerns for the elderly and children. Its features are unmatched by stone and tiles.

■ Noise reduction

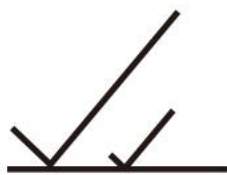

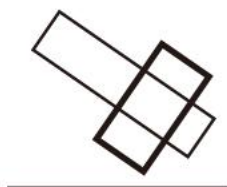

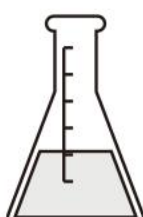

It features environmental friendliness, sound insulation, moisture resistance, etc., enabling families to enjoy a quieter and more comfortable indoor environment. The soundproof mat has sound absorption and insulation functions, allow-

■ Advantage

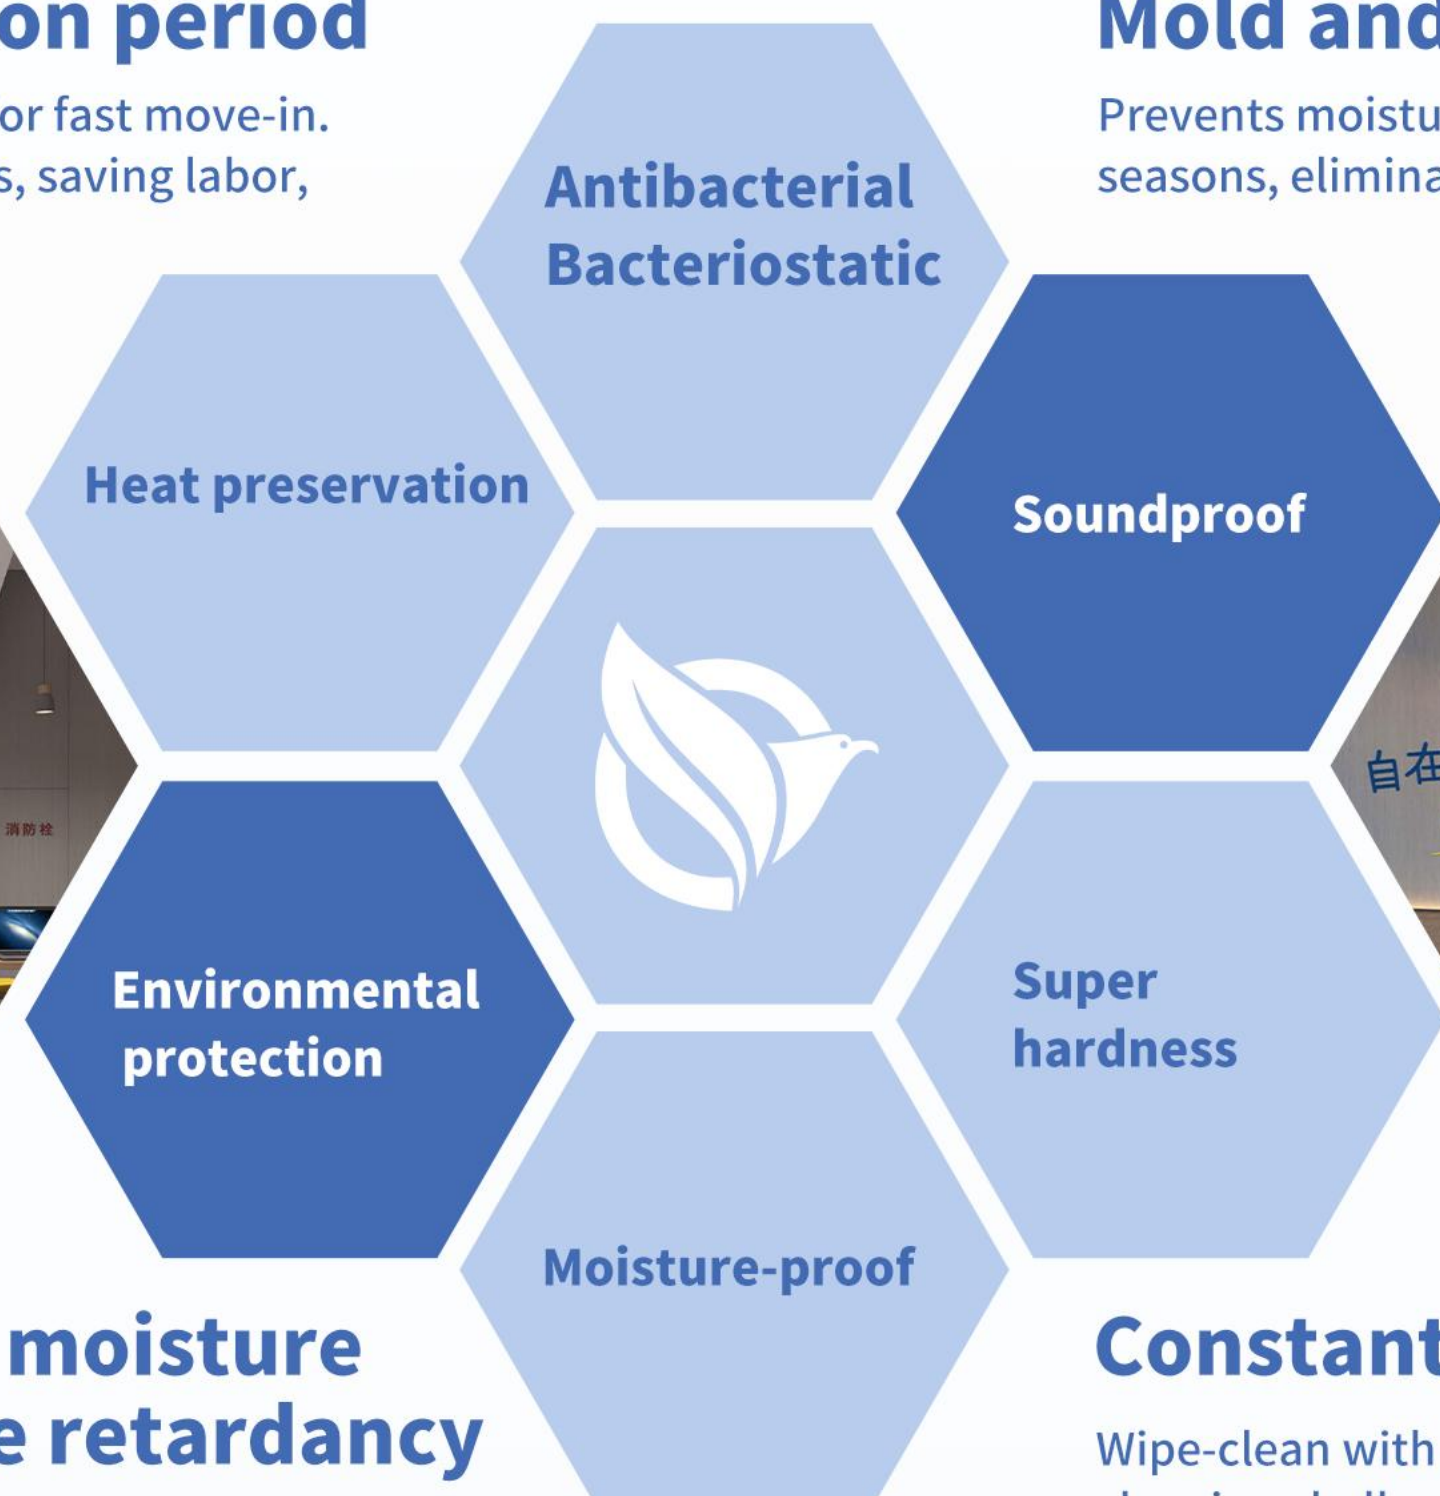

Short construction period

Easy installation, quick setup for fast move-in. Can be installed on rough walls, saving labor, time and space.

Mold and moth prevention

Prevents moisture and efflorescence during rainy seasons, eliminating bacterial growth.

Fire prevention, moisture resistance, flame retardancy

Flame Retardant Class B1 compliant with engineering fire safety standards.

Constant shape, easy to clean

Wipe-clean with cloth, effectively resolving cleaning challenges in decorative materials.

UV layer

Compared to regular UV
More wear-resistant and scratch resistant

Wear layer

Commercial-grade wear
resistance with 3D embossed texture

Color film layer

Realistic 3D texture with
a porcelain-like finish.

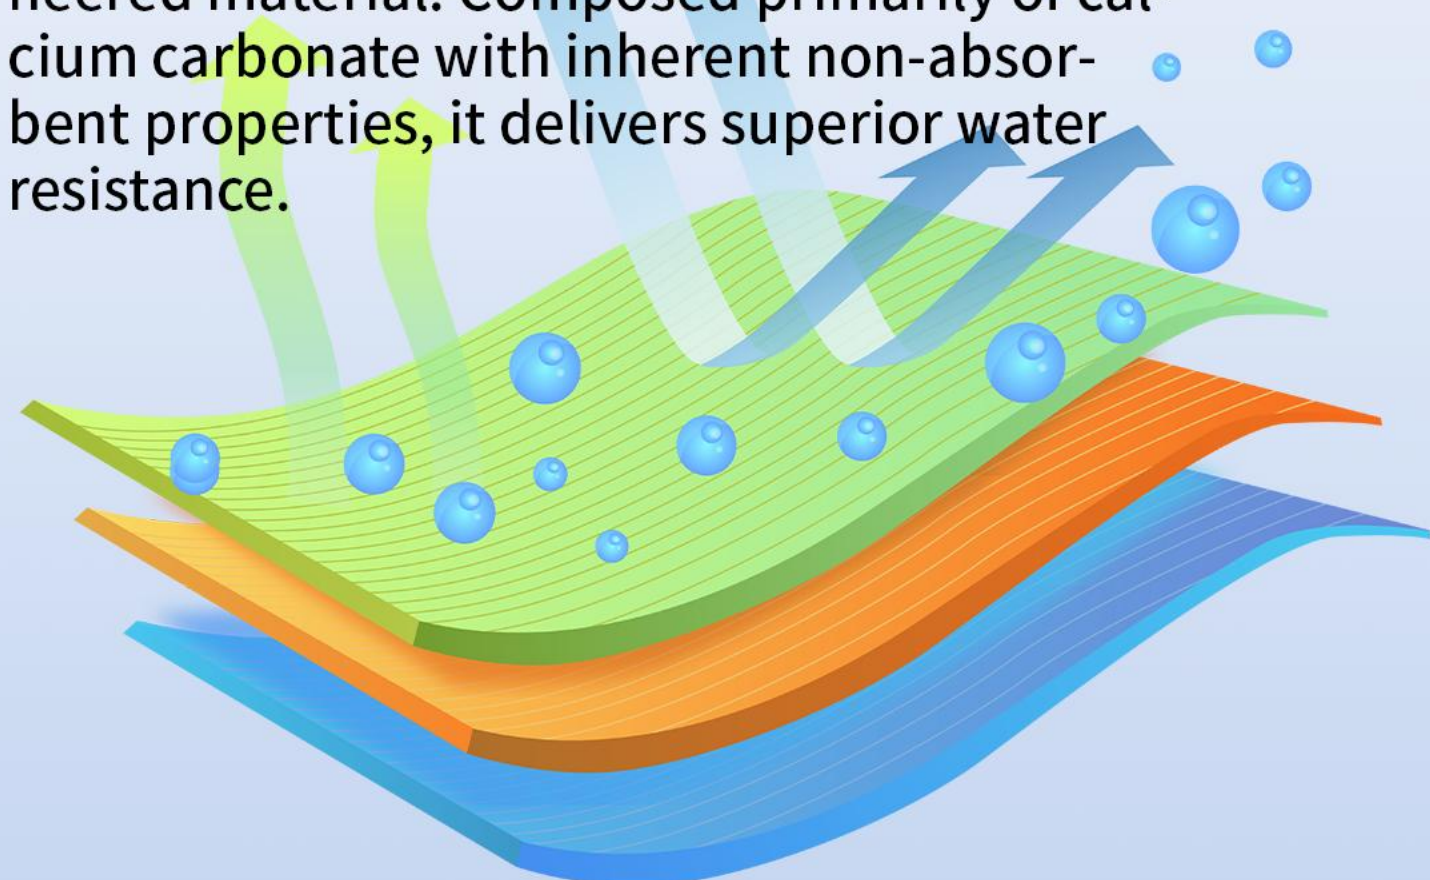

SPC stable base layer

Upgraded reinforced base layer enhances wear
and stain resistance, extending wall panel lifespan.

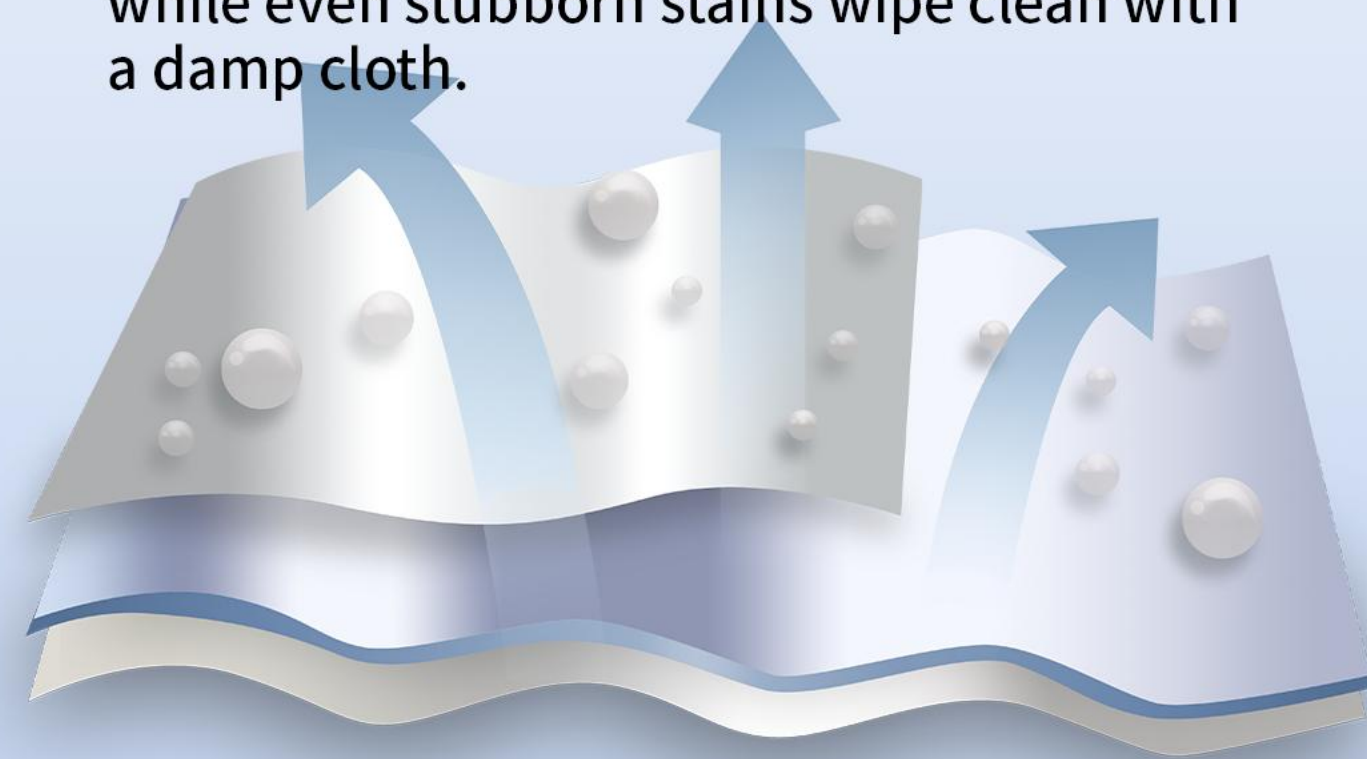

■ Waterproof property

SPC wallboard is 100% waterproof engineered material. Composed primarily of calcium carbonate with inherent non-absorbent properties, it delivers superior water resistance.

■ Stain resistance

Proprietary dual UV coating ensures exceptional stain resistance for SPC wall panels: most marks remove effortlessly, while even stubborn stains wipe clean with a damp cloth.
